OUR FAUCET SWING PROCESS

At Anmol Sanitations, every product is manufactured with precision, advanced technology and strict quality control to deliver superior performance and long-lasting durability.

1 Design & Mold Development

Advanced CAD design and precision mold development ensure perfect dimensions and superior quality.

2 ABS Injection Moulding

High precision injection moulding machines produce components using premium virgin ABS material for strength and consistency.

3 Surface Preparation

Components are trimmed, polished and cleaned through multiple stages to ensure a smooth surface for premium finishing.

OUR FAUCET SWING PROCESS

From precision engineering to final testing, each step is controlled to maintain the highest standards of quality and reliability.

4 Chrome Plating

Advanced chrome plating process gives a mirror finish, excellent corrosion resistance and long-lasting shine.

5 Assembly & Testing

Products are assembled with precision components and tested for water pressure and leakage to ensure reliable performance.

6 Quality Check & Packing

Each product undergoes strict quality inspection and is carefully packed to ensure safe delivery in perfect condition.

WELCOME TO ANMOL SANITATIONS

ANMOL SANITATIONS is now making waves in the bathroom fixtures manufacturing and wholesale industries. With a focus on delivering Top-Notch products, **ANMOL SANITATIONS** bath aim to transform bathroom across India into luxurious and stylish spaces.
